UNREF EXECUTIVE COMMITTEE

Eighth Session

Addendum No. 4

to the

UNREF REVISED PLAN OF OPERATIONS (1958)

(Submitted by the High Commissioner)

INTRODUCTION

1. At its seventh session the UNREF Executive Committee approved a target for the Revised Plan of Operations (1958) in an amount of $5,500,000. Within this target, projects requiring UNREF contributions of $4,818,562 were approved at the same session, leaving an amount of $681,438 for which projects were to be submitted at a later stage.

2. This amount was composed of the following allocations:

	US $
Permanent solutions	376,581
Settlement of difficult cases	235,100
Unallocated balance	69,757
TOTAL	681,438

It is now proposed that $10,000 of the balance of $69,757 be allocated to permanent solutions for refugees in Italy, thus increasing to $386,581 the total value for which further projects for permanent solutions can be submitted.

3. In Part I of this document new projects are submitted to the Committee for approval within these allocations. These projects require contributions from UNREF in the following amounts:

			US $
Permanent solutions:	Austria	376,581	
	Italy	10,000	386,581
Settlement of difficult cases:			
	Austria	160,100	
	Italy	75,000	235,100
	TOTAL		621,681

4. In addition, the approval of the Committee is sought for the revision of three projects for permanent solutions for refugees in Germany. This revision involves no increase in the approved contributions from UNREF.

5. Part II of the present document contains recommendations for a revised list of priorities for projects included in the Revised Plan of Operations (1958), including the new and revised projects submitted for approval in Part I.

6. As was done for the seventh session of the Committee, the problems relating to the Far Eastern Operation are dealt with in a separate document (A/AC.79/110).

PART I: NEW AND REVISED PROJECTS

SECTION I - PROJECTS FOR PERMANENT SOLUTIONS

1. AUSTRIA

General remarks

7. At its seventh session, the UNREF Executive Committee approved an allocation of $1,500,000 for permanent solutions projects for refugees in Austria within the Revised Plan of Operations (1958). Within this allocation, the Committee approved projects requiring UNREF contributions in the amount of $1,123,419, leaving a value of $376,581 for which additional projects can be submitted.

8. In this document, the following additional projects are submitted for approval by the Executive Committee:

Type of project	Proposed UNREF contribution US $
Housing programme	350,081
Rehabilitation of handicapped refugees	26,500
TOTAL	376,581

9. As in the case of projects submitted to the Executive Committee at its previous sessions, these new projects have been designed to help in clearing the camps in Austria.

10. A list of camps to be cleared in 1958 was submitted to the Executive Committee at its seventh session in document A/AC.79/91, page 3. Due both to a reduction in costs and to the rapid implementation of projects, especially the housing projects, it has now proved possible to add, in agreement with the Austrian authorities, the following five federal camps to the list of camps to be cleared in 1958 and in the first months of 1959:

Land	Camp	Refugees [a]
Salzburg	Rossittenkaserne	53
Styria	Trofaiach	92
	Kapfenberg II	86
Carinthia	Waidmannsdorf	180
Vienna	Rothschildspital	27
	TOTAL	438

a Number of refugees as of January 1958, excluding new Hungarian refugees.

11. The new projects which are now submitted for approval by the Executive Committee will also be used to clear still further federal camps in Austria and I refer in this connexion to the programme for camp clearance submitted in document A/AC.79/114.

Analysis of projects

Project PS/HP/AUS/1958(b) Cost to UNREF: $350,081

Housing Programme

12. A housing programme for 1958 in the amount of $777,919* was approved by the Executive Committee at its seventh session. An additional housing programme requiring UNREF contributions in the amount of $350,081 is herewith submitted for the Committee's approval.

13. It is anticipated that under this additional programme some 188 apartments at an estimated total cost of $546,700 will be constructed, to which a contribution of $196,619 is expected from Austrian sources, while $350,081 will be contributed from UNREF. On the basis of the first part of the 1958 housing programme, about 36% of the average total cost, or $1,046, would be contributed by Austrian sources and approximately 64%, or $1,862, would be borne by UNREF. A possible increase in the Austrian share on favourable credit terms is, however, at present being negotiated by my Branch office.

14. It is expected that some 530 refugees will be housed under the proposed programme.

15. As in the first part of the 1958 housing programme, the primary objective has been to reduce the total building costs and to arrive at rents which can be afforded by refugees who are not in a position to pay the rents required under normal housing schemes.

---

* Including $17,390 for the Housing Secretariat (project PS/95/AUS/1958).

16. The continued efforts of my Branch Office have made it possible to develop new types of housing and to lower the net building cost considerably. Thus the original programme for 1958, as submitted to the Executive Committee at its seventh session in document A/AC.79/91, envisaged that a total of 455 dwellings would be constructed, 285 under PS/HP/AUS/1958(a) and 170 under PS/HP/AUS/1958(b). In fact it is now expected that 557 dwellings will be constructed by the programme: 369 under PS/HP/AUS/1958(a) and 188 under PS/HP/AUS/1958(b).

17. In addition to the types of housing described in document A/AC.79/91, a new type "D" has been developed to house smaller family units or 2-3 single persons. The size of this new type "D" housing will average 35 square metres and the rents will be below those for the type "C" housing.

18. In view of the fact that a considerable proportion of the refugees to be housed under this programme belong to the handicapped categories, it will probably be necessary, as for some projects under the previous Plans of Operations, to convert the UNREF loan into a grant, or at least to suspend the repayment of the loan for several years.

Project PS/193/AUS — Cost to UNREF: $26,500

Rehabilitation of handicapped refugees

19. Under this project a contribution of $26,500 is requested from UNREF to meet expenses involved in the rehabilitation of some 100 refugees in camps who require individual treatment and assistance to overcome their handicaps.

20. Rehabilitation will be provided through existing Austrian institutions or other appropriate bodies. The UNREF contribution will go towards the costs of maintenance for a short period in homes and institutions, medical treatment and vocational training. The per capita cost for rehabilitation of these refugees will depend on the nature and duration of treatment or training.

21. The refugees will be examined case by case. After consultation with experts, the integration counsellors will make an appropriate recommendation to UNHCR for each refugee examined.

2. GERMANY

General remarks

22. In the following paragraphs the revision of three projects approved by the Executive Committee at its seventh session is submitted for consideration and approval. This revision does not require additional funds from UNREF.

Analysis of projects

Project PS/47/GER/1958/Rev.1 — Cost to UNREF: $32,857

Individual housing

23. At its seventh session the Executive Committee authorized for implementation project PS/47/GER/1958 requiring an UNREF contribution of $32,857. This project was to provide dwellings in rural areas in Germany to accommodate physically handicapped refugees dependent on public relief.

24. Experience has shown that occasionally accommodation within the existing housing stock in Germany becomes available not only in rural areas, but also in industrial regions. This accommodation can be obtained for fit refugees in the same way that rural accommodation can be made available advantageously for those in the handicapped categories.

25. It is therefore proposed to extend the scope of this project to enable such individual housing as may become available in employment areas to be obtained for able-bodied refugees.

PS/41/GER/1958/Rev.1 — Cost to UNREF: $71,429

Small loans

26. The Executive Committee authorized for implementation in category B/1958 project PS/41/GER/1958 requiring an UNREF contribution of $71,429, while a further $7,143 is being contributed by the voluntary agencies implementing the project. Its purpose was to grant small loans averaging $119 each to assist some 600 employable refugees from camps and their families to obtain household furniture and to buy tools or other equipment required for their employment.

27. The UNREF small loans take the place of similar assistance provided to German expellees and refugees under the German Federal Act on the Equalization of Burdens (Lastenausgleichsgesetz). This legislation does not apply to refugees within the mandate of my Office.

28. Experience acquired in the course of the implementation of existing projects for small loans has shown that a loan of $119 is, on the average, not sufficient to provide the refugees with the minimum of furniture and equipment that they need. In fact, the assistance granted to German refugees and expellees under that law averages approximately $190. It is therefore proposed to increase the average loan made to foreign refugees under this project up to the level of $190. The cases who could then benefit from the project would number some 375.

29. In order to expedite the granting of loans, it is also proposed to streamline the procedure and to enable the implementing agencies to make the loans without securing the prior approval of the UNHCR Branch Office for Germany. However, due control of the loans granted will be kept by the Branch Office and safeguards will be taken to ensure full repayment to UNREF if any loans should be granted to ineligible persons.

PS/42/GER/1958/Rev.1 — Cost to UNREF: $142,857

Installation grants for handicapped refugees

30. At its seventh session, the Committee authorized for implementation project PS/42/GER/1958 requiring an UNREF contribution of $142,857. The purpose was to provide small grants averaging $143 each to assist some 1,000 physically handicapped and difficult-to-settle refugees from camps and their families to obtain household furniture and to buy tools or other equipment required for their employment.

31. The facts given in paragraph 28 with reference to small loans also apply *mutatis mutandis* to installation grants. It is therefore proposed to increase the average grant made for foreign refugees under this project up to the level of $190. The refugees and their families who could then benefit from the project would number some 750.

3. ITALY

General remarks

32. At its fifth session the UNREF Executive Committee approved a group of projects for refugees living outside camps in Italy. These projects were intended both to inform my Office on the situation and needs of these refugees (project PS/15/ITA), and to provide appropriate UNREF assistance wherever necessary to facilitate their rehabilitation and integration (projects PS/16/ITA, PS/17/ITA and PS/20/ITA).

33. The individual counselling and preselection to be carried out under project PS/15/ITA was, however, postponed until advantage could be taken of the findings of the statistical survey subsequently decided upon by the Committee under project PS/1/EUR. The information provided by this survey forms the starting point of a case-by-case examination now being carried out on refugees considered not to be firmly settled.

34. At the present time the majority of cases living in Rome and its vicinity have been examined, but there still remain 1,200 cases to be studied distributed in various parts of Italy. In view of the limited number of social workers responsible for carrying out this work and the large amount of travel and interviewing involved, it appears necessary to prolong project PS/15/ITA for a period of 6 months in order that the work undertaken may be brought to completion.

Project PS/15/ITA/1958 — Cost to UNREF: $ 10,000

Preselection and counselling

35. Under this project a contribution of $10,000 is requested from UNREF to meet the expenses, from 1 August 1958 to 31 January 1959, of the preselection and counselling team created in co-operation with several voluntary agencies under project PS/15/ITA/1957.

36. The main tasks of this team are:

(a) to collect precise information on each case among the non-settled living outside camps in Italy and not eligible for USEP assistance;

(b) to assess and seek local employment opportunities and to counsel the refugees with a view to their placement in such employment;

(c) to present the cases requiring UNHCR assistance, with appropriate recommendations, to the bodies responsible for the final selection of refugees to benefit under the various UNHCR projects and schemes;

(d) to formulate recommendations for new or revised projects where definite needs are not covered by existing projects.

Refugees who need only adequate accommodation to become firmly settled are not considered under points (b) to (d) above.

37. The team, which is directed by a supervisor appointed by UNHCR in agreement with the Italian authorities, consists at present of three social workers and clerical staff. Each of the voluntary agencies participating in the project designates one or more of its most qualified field workers to interview refugees living in their locality.

38. It is expected that the expenditure made under this project will be as follows:

	US $
Salary, allowances and travel expenses of the supervisor	1,200
Salary, allowances and travel expenses of the social workers and field workers	5,000
Clerical staff, equipment, office supplies and miscellaneous expenses	3,800
TOTAL	10,000

SECTION II - SETTLEMENT OF DIFFICULT CASES

1. AUSTRIA

Project DC/27/AUS — **Cost to UNREF: $ 160,100**

Housing and permanent care

39. Under this open project a contribution of $160,100 is requested from UNREF for the settlement in one-room apartments of an estimated number of 125 difficult cases who are not in need of institutional care.

40. It is proposed to build these apartments close to housing settlements for non-handicapped refugees. Each apartment will have separate cooking facilities, but amenities such as bath facilities, laundry, etc. will be provided in common for each group of apartments. Where necessary, a resident nurse or warden will ensure that the difficult cases are attended in case of sickness.

41. Where the provision of medical care and occupational therapy facilities is considered desirable, arrangements will be made if possible for the housing settlements to be constructed in the neighbourhood of hospitals or institutions.

42. It is expected that the UNREF grants to be made under this project will average approximately $1,300 per case and that a supporting contribution will be available from the Austrian authorities.

43. The non-institutional difficult cases who will be settled under this project will retain their entitlement to the welfare assistance they are at present receiving. It is, however, intended to make arrangements with the local authorities to obtain rent subsidies for difficult cases.

44. The implementation of previous UNREF programmes limited to institutional settlement of difficult cases has shown that there is reluctance on the part of the majority of these refugees to enter institutions. It is estimated that the vacancies in institutions financed from UNREF will be sufficient to provide solutions for those difficult cases who are in need of institutional care and are willing to enter institutions. The present open project is designed to provide alternative solutions for those difficult cases living in camps in Austria who are not in need of institutional care and who are still able and anxious to look after themselves subject to a certain amount of assistance and supervision.

2. ITALY

Project DC/18/ITA — Cost to UNREF: $75,000

Settlement in and outside Italy

45. Under this open project, a contribution of $75,000 is requested from UNREF to provide grants for the permanent settlement of aged and sick refugees in appropriate homes and institutions or in private accommodation in or outside Italy. For difficult cases from camps for which this type of solution is not indicated,

authority is requested alternatively to provide small annuities under this project. The grant to be paid for each refugee would vary between $600 and $1,500 according to the type of case.

46. The difficult cases among the refugees in Italy, especially those still remaining in camps, are frequently not in need of institutional care and individual solutions must be sought for them.

47. The purpose of this project is to allow UNHCR to make use of any suitable opportunities for the permanent settlement of these refugees which may become available in Italy or in other countries.

PART II: RECOMMENDATIONS FOR THE ORDER OF PRIORITY

48. At its seventh session, the Executive Committee authorised projects requiring UNREF contributions in the amount of $5,796,654 for implementation as funds become available, in the order of priority given in Annex I to document A/AC.79/102 (Category B/1958). The following modifications in the order of priority are now recommended to the Committee.

49. Up to 30 April 1958, non-governmental contributions to UNREF have been received for the financing of ten among the projects listed in category B/1958. It is therefore proposed to put these projects or parts of projects, for which funds are immediately available, in a new category A/1958. These projects require UNREF contributions amounting to $135,327.

50. As explained in the Progress Report (document A/AC.79/108), project PS/2/AUS/1955 (c) (ii) appearing as item 36 in category B/1958 has been cancelled. On the other hand, new parts (c) and (d) have been added to project FE/1/1958 in view of the developments described in document A/AC.79/110 dealing with the Far Eastern Operation. While part (d) is financed out of a private contribution ($8,317), part (c) requiring $100,000 from UNREF has been inserted after item 10 in category B/1958.

51. The emergency situation in Hong Kong has also made it necessary to recommend a higher priority for parts (a) and (b) of project PS/5/RKS/VAR. These two parts of the project are now merged into a new item 14 in the proposed category B/1958/Rev.1. For this change reference is also made to document A/AC.79/110.

52. The present state of contributions to UNREF is described in document A/AC.79/118. It is recommended that in view of the financial situation of UNREF, several projects designed to help in clearing the camps should be given a higher priority so as to avoid a possible interruption in the process of camp clearance.

53. Finally, if the Committee approves the new projects submitted in Part I of this document, it may wish to include these projects in the revised list of priorities.

54. All the modifications proposed in the preceding paragraphs are taken into account in the recommended lists of priorities attached at Annex I to this document. In drawing up the list of category B/1958/Rev.1, attention was paid to maintaining an appropriate balance between the various areas where the projects are to be carried out.

ANNEX

RECOMMENDED ORDER OF PRIORITY

(CATEGORIES A/1958 AND B/1958/REV.1)

CATEGORY A/1958
